HVAC 101

October 11 – 14, 2022
November 15 – 18, 2022
February 14 – 17, 2023

MCI National Training Center, Louisville, KY

This is the first of 4 classes that need to be completed to obtain the MCI HVAC Specialists Diploma.

HVAC 101

This course covers basic refrigerant theory, components and operating principles. Federal regulatory requirements will be explained in great detail, and all students will be given the EPA 608 and 609 certification testing. EPA certification must be earned by the completion of the program.
